Enhance your website and empower your users with ...

KnowWho®
Hosted Applications

KnowWho Hosted Applications provide powerful and comprehensive content for your website without having to maintain the back-end data. These apps are hosted on our servers and embedded within your website with a minimum of effort, and they are updated daily so you always get the most current info.

Attention Developers & Site Administrators
Visit our new Developer Center to register for free trials, view technical specifications, and more at
**https://www.knowwho.com/secure/developer.asp**

HOSTED APPLICATION BENEFITS

- **FAST** - one hour of setup time and one line of code is all you need to be up and running
- **EASY** - complete documentation with step-by-step instructions will have you using our hosted apps without a steep learning curve or writing code
- **AFFORDABLE** - hosted application costs are based on usage so you only pay for what you need
- **FLEXIBLE** - multiple fixed width or fluid sized form factors are available to work with any web layout
- **SELECTABLE** - You decide what service level and government coverage you need (MemberFrame only) so you can custom tailor your content
- **ACCURATE** - all of our databases are updated daily so your content will always by current
- **POWERFUL** - our hosted applications will create dynamic and comprehensive information on your website, and you can add optional services like Messaging to extend the value even more
- **ENGAGING** - your website visitors will find the information and features our hosted applications provide both compelling and valuable, and that will keep them coming back to your website
- **ONE-SOURCE** - get everything you need from a single vendor so bundled pricing & streamlined

HERE IS HOW IT WORKS:

- You create a page within your website and insert an appropriately sized IFRAME element
- You manage your hosted application instances with our easy-to-use online Developer Center
- Our hosted applications parse your input values and display the appropriate content or map
